

DESCRIPTION

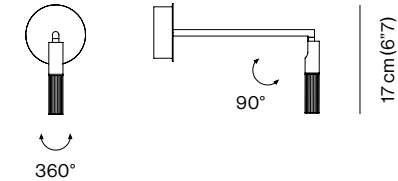

Beak Picture is designed for precise illumination on vertical surfaces, emitting a focused and direct light. The adjustable cylindrical head, with a reduced diameter, extends from the wall through a horizontal burnished brass arm. The contrast between the smooth body and the knurled detail of the head introduces depth and a measured material rhythm. Available in Flat version with a reduced-thickness canopy, the Beak collection also includes wall, ceiling, reading, table, floor, and suspension models.
